Avfall/søppel

Hvor lang tid tar det

før nedgravd avfall blir tilintetgjort/nedbrutt?¹⁾

3-minutter, 20. november 2007

ved

Eva Grete Storengen Skaar

deltaker på

¹⁾ ISWAs (International Solid Waste Association) verdenskongress i Wien, Østerrike, 24.-27.09.2007

Kjære president, rotaryvenner og gjester!

- Bildet på skjermen ble vist på ISWA-kongressen og delegatene ble bedt om å estimere hvor lang nedbrytningstid hvert produkt har.
- Det var ingen som svarte riktig.
- Den lange nedbrytningstiden var alarmerende.
- Nå kan dere gjette!

Worksheet: Learning Site Waste Dump

Task: Estimate how long the buried materials take to decompose.

If you are not sure you can dig out the items. Please bury them again for future visitors!

Worksheet: Learning Site Waste Dump

Task: Estimate how long the buried materials take to decompose.

If you are not sure you can dig out the items. Please bury them again for future visitors!

The image displays various waste items arranged in a grid-like fashion, each with a label indicating its estimated decomposition time in years:

- 5 years: A crumpled blue plastic bag.
- 5 years: A small white plastic bottle.
- 50 years: A brown leather shoe.
- 1/2 year: A green vegetable (broccoli), a brown nut, and two orange fruits (oranges).
- 5 years: A blue plastic bottle.
- 50 years: A box of food (possibly instant noodles).
- 1 year: A green plastic bottle cap.
- 50 years: A purple and green plastic bottle.
- 1,000,000 years: A dark green glass bottle.
- 100 years: A green plastic bottle.
- 5 years: A small yellow object (possibly a piece of food or a small toy).
- 1 year: A newspaper, a yellow egg carton, and a red plastic bottle.
